Subject: Questions and Concerns about Quarry Expansion on Lavigne Road Corbeil ON
To: pebblebeachaggregate@sympatico.ca <pebblebeachaggregate@sympatico.ca>, <ARAapprovals@ontario.ca>

Hello,

I am writing this letter as a concerned resident about the Quarry Expansion Project on Lavigne road, Corbeil, ON.

I know that the Quarry expansion will offer opportunities for the community to develop and grow. It is expected. Right!

So, my Big question is...

How will the existing residents be protected from the negative impacts/issues that Will happen, living so close to an expanding quarry?

Here are other questions that I would like answered.

- Why can't the existing residents be notified before a blast?
- Will the Suspended Particulate Matter (SPM) be monitored every time after a blast?
- Will the community have access to the readings of Suspended Particulate Matter (SPM) every time after a blast?
- Who will be responsible for reading the air quality? And where can I get the information?
- Granite; Quartz-Feldspar-Biotite Quarries Are known for poor health problems for workers and sensitive receptors.
- What procedures will be in place for dust control on the roads and for controlling dust in the air after a blast?
- Will my taxes go up because of road maintenance of truck traffic?
- Will my property devalue because of the quarry expansion?

I moved here to get away from the noise and traffic of the city. I was fine with the sand pit being in my neighborhood. Now that it is going to be a full-blown quarry. More noise pollution, more air pollution, water quality may or may not be affected, damage to the roads the list goes on...

How will this Quarry Expansion contribute to the health and well-being of the community?

Here is a link to an article, I found about an aggregate company in Orillia going Above and Beyond legislation.

Please read till the end of the article. It will mention solutions that will help both parties.

Voicing my questions and concerns is all I can do.
