Yes Pauline you are welcome to share my email the rest of council because the truth is very hard to swallow because people will be upset if septic system needs repair as a property sells it should mandatory for a Pumpout and thorough inspection be done especially the west basin
Thank you for your prompt reply

Hello Adrien!

Thank you for writing to share with the Municipality your concerns regarding Lake Nosbonsing. As a Municipality and with the support of the North Bay Mattawa Conservation Authority we are all concerned about the health of the Lake and that is why your comments are important to us. In keeping with this concern, the Municipality recently had a Lake Assessment Study commissioned and a copy is attached. We continue to monitor the Lake's condition and that is why with your permission I would like to share your email with the Council correspondence...please advise if I may do so.

Regards,
Pauline Rochefort

Hello Pauline

I have been coming to Lake Nosbonsing since 1980 and purchased a property in 2002. Ever since coming here the water has not gotten better because there's too many property owners steel septic tanks that are rotted as well in the west basin grey water is going directly into the lake.

Contrary to what administration has told me in an email this has no septic barge to Pumpout the tanks on the islands.

So are able to at least get something started to clean up the lake as I speak to neighbours we are all very aware that the buck gets shoveled over to Mattawa conservation which nothing is being done.

Thank you for your time.
