Attention:

Rick Champagne

Councilor and Chair of Recreation Committee

RECEIVED

Request to relocate the AED at the EFCC

Dear Rick,

The executive team had a meeting last week to start preparing for this year's season and a question came up regarding the Automatic External Defibrillator (AED) that is located in the Arena main lobby.

As you know there are many occasions when the arena is closed and access to this AED is not possible from the curling club. This device has proven to be extremely helpful in saving individuals that may suffer a heart attack. With our aging demographics with increasing risk of having a heart attack the curling club executive is wondering if the current AED can be relocated so that it can be accessible from the curling club when the arena is closed.

To date we have been fortunate in not having to cope with this situation but would like to be prepared for an unfortunate event in the future.

Trusting that this request will be accepted by council and can be accommodated for the upcoming season.

Sincerely,

A handwritten signature in cursive script that reads "Paul P. Marier".

Paul P Marier
President NCC
