

Resolution – Restrict or Eliminate Used Car Sales to USA

WHEREAS every year approximately 200,000 to 300,000 used cars are sold and exported into the United States;

AND WHEREAS the burgeoning North American trade war will drive up the prices of new cars by thousands of dollars, sparking a major consumer shift toward the used vehicle market;

THEREFORE BE IT RESOLVED that Council for the Municipality of East Ferris requests the federal government examine how to restrict the sale of used vehicles to the USA from Canada or entirely in this period of increased need for vehicles.
